EXCLUSIVE SENSOR SYSTEM

Pivots with perfect precision!

The Exclusive Sensor System automatically raises and lowers the presser foot to four positions. The Sensor Foot Extra Lift gives you maximum space under the foot. With Sensor Foot Pivot the machine senses the fabric thickness when stopping with the needle down to raise the foot to the float position for instant pivoting.

Plus, the Sensor Foot Pressure automatically senses any fabric thickness and adjusts for perfectly even feeding.

EXTENDED SEWING SURFACE

Greets you with open arms!

Husqvarna Viking Sapphire features the longest Free Arm in the industry with large Extended Sewing Surface. You have more sewing and fabric space than ever before on a home sewing machine. The area from the machine side to the needle measures 250 mm (10"). Sewing small projects and circular techniques is easy because the needle is close to the end of the free arm.

"The surprise proposal."
